Q: MSYS clang can't find libclang I'm trying to build the project from the "Some Refactoring" chapter of Learn You a Haskell for Great Good. I am working on Windows 7 using the Git Bash terminal. I've cloned the repository to my %TEMP% folder, and then I've changed into this directory. I've tried running the following command to build the program, but it fails with the following error: C:\Users\Riley\Desktop\real>cd.\%TEMP%\hc-exact-cover-1.0.0.0 C:\Users\Riley\Desktop\real\.\hc-exact-cover-1.0.0.0>msys_shell.bat c:\Users\Riley\Desktop\real\.\hc-exact-cover-1.0.0.0>make Building file:../hc-exact-cover\lib\Framework\Engine.hs In file included from C:/msys64/mingw64/bin/./lib/gcc/x86_64-w64-mingw32/9.2.0/include/c++/bits/stl_algobase.h:62:0, from C:/msys64/mingw64/bin/./lib/gcc/x86_64-w64-mingw32/9.2.0/include/c++/iostream:39, from C:/msys64/mingw64/bin/./lib/gcc/x86_64-w64-mingw32/9.2.0/include/c++/iostream: 2d92ce491b
