Again in the list click on the "AUTOCAD Mesh" option and click on "CONVERT" and you will see the mesh option in the list. Now the mesh option will appear on the list of options in the top navigation bar of the software. 4. Click on "Mesh" to continue Now you will see the option "AutoCAD Mesh" (from this list) and click on "CONVERT" button and you will see another dialog box with the option "Autodesk Autocad Mesh" and click on "YES" option. Again in the list click on the "AUTOCAD Mesh" option and click on "CONVERT" and you will see the mesh option in the list. Now the mesh option will appear on the list of options in the top navigation bar of the software. Click on "Save" and save the file to the path "\\Program Files\Autodesk\AutoCAD 2019\Mesh\Conversion\". Now you can import the converted mesh into AutoCAD. A: There is no such thing as Mesh-To-Mesh from AutoCAD. It's Autocad-To-Mesh. The only thing you can do is have AutoCAD generate a Mesh file, and then import that file into AutoCAD. Mesh->Mesh Q: use list as enum in python I know that in java, we can create an enum by a list of integer values. I wonder is there any similar way in python? For example, I have a file, test.txt, containing some words: aa bb cc dd ee ... I also have a list of
